1. Claims 6,12,23-29 are under consideration. Claims 1-5,7-11,13-22 have been canceled. Applicants amendment has necessitated the following species election.

2. Claim 6 is generic to a plurality of disclosed patentably distinct species comprising a
- a) antibody
 - b) antibody fragments

These proteins are chemically distinct and have different functional properties.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. If applicant elects a) antibody, the following additional species elections are required.

- a) This application contains claims directed to the following patentably distinct species of the claimed invention. The antibody of claim 24 or 25.

These proteins are chemically distinct and have different functional properties.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

- b) Claim 26 is generic to a plurality of disclosed patentably distinct species comprising a
 - a) polyclonal antibody
 - b) monoclonal antibody

These proteins are chemically distinct and have different functional properties.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

4. If applicant elects b) antigen binding fragment, the following additional species elections are required.

a) Claim 28 is generic to a plurality of disclosed patentably distinct species comprising the four different antibody fragments recited in said claim.

These proteins are chemically distinct and have different functional properties.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Papers related to this application may be submitted to Group 1600 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). Papers should be faxed to Group 1600 at (703) 308-4242.
